ABOUT US

Halonix Technologies Pvt. Ltd. is amongst India's fastest growing electrical company caters to both retail and institutional buyers with its innovative, economical and smart-tech offerings across Lighting, Fans, Smart/IOT, and Health & Security Products. The company has been a forerunner in the development of energy-efficient lighting solutions in various segments like PSU's, Government, Railways, Airports, NHAs, Manufacturing Industries, IT/ITES, Corporates, Hospitality and Healthcare. With the credo of Make in India and Made for India, Halonix's success has been built on its unparalleled ability to develop, validate, and deploy solutions that are relevant and suitable for Indian conditions. Because of its ceaseless key focus on innovation across the product range, the brand is widely accepted by end customers & business influencers like architects & electrical consultants throughout India.

Halonix is one of the few companies in India with a fully accredited NABL self-certified laboratory and state-of-the-art R&D laboratory within its manufacturing plant, allowing its dedicated R&D and design teams to push the envelope and develop cutting-edge products tailor -made for Indian consumers. The company has state-of-the-art manufacturing facilities and has been accredited with ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 certifications. It is also the first company to set up a pan-India dedicated service network for lighting to cater to the need of retail and institutional segments. Its wide distribution network comprising of over 800 dealers & distributors and 20 depots ensures that its products are made available across the length and breadth of a country.

Spearheading the technological revolution, the company has been at the forefront of introducing energy-efficient lighting solutions. Halonix was the first CFL manufacturer and was also the first to introduce LED lighting solutions in India. Today, Halonix is one of the top 5 lighting brands in the lighting industry. Halonix has carved a niche for itself in adding high-tech products such as DJ Speaker Bulb, Speaker Bulb, Fire Alarm, Smart Wi-Fi Plug, family of Inverter Lighting Products, family of Prizm – Millions of Colours Lighting Solutions, Radar Motion Sensor Bulb, family of All Rounder 3-wattages-in-one Bulbs and Battens, Indoor & Outdoor Lighting Solution, RF wireless based Smart Lighting, Bluetooth based solution, Architectural Lighting, Façade Lighting to its product portfolio with an in-house product design and development team.

Halonix has also launched innovative products in the Fans segment by combining innovation and user-centric design to create greater value for its customers. Some path breaking innovations include Morpheus - India's first retractable blade chandelier fan, Halo - a novel design IOT fan, Cuboid - a low ceiling lighting and fan solution and Smart IOT Fan Kit amongst others.

Halonix Shield, the sub-brand of Halonix, offers innovative, value-for-money solutions to meet the health & security needs of Indians. Halonix Shield is at the forefront of introducing novel, cutting-edge, indigenously manufactured products and solutions for both residential and institutional use. Every Halonix Shield solution carries the hallmark of quality and trust that our valued customers have come to expect from Halonix. All Halonix Shield solutions, are scientifically designed, rigorously tested and come with warranty and a full suite of repair and service capabilities.

**SOLAR STANDALONE
SOLAR LED STREET
LIGHTING**

- ◆ The Standalone Solar LED street light system includes LED luminaire with in-built solar charge controller, solar PV module, battery, pole, PV structure, battery box, wires, and other accessories required for the product to be complete.
- ◆ To know about the PV panel, battery capacity, pole type, and other details, please refer to the specific product TDS.
- ◆ Bluetooth, remote monitoring, hybrid 230V AC operation, and other smart functionalities are available on-demand, at an extra cost.
- ◆ You also get an MPPT/PWM-based, in-built, dusk-to-dawn, auto ON/OFF controller.
- ◆ The batteries used for this product are Low-maintenance Lead Acid (LMLA) batteries. We will make available VRLA GEL, Li-ion, and LIFEPO4 batteries as per the demand.
- ◆ A GI tubular pole with in-ground type mounting is a part of the package. A WPB denoted as tubular pole with a base. WP denotes With Pole; WOP stands for Without Pole. A 60W and above solar street light includes a 7-meter octagonal standard pole denoted as OCT. Any change in the pole type in existing system may cause the cost to vary.
- ◆ In-built, auto dimming provided in addition to after dusk ON; a PIR motion sensor-based ON/OFF/dimming option is also available on demand.
- ◆ LED street lights are available in the CCT range of 5700 to 6500K; however, they can be available in different CCT options like 3000K or 4000K on demand.
- ◆ WP denoted as With Pole and WOP as Without Pole.
- ◆ Any specific customization of our products can be made available on-demand, and the cost may vary accordingly.

**ALL IN ONE SOLAR LED
STREET LIGHTING**

- ◆ The integrated/All-In-One Solar LED luminaire comes with an in-built solar charge controller, solar PV module, battery and mounting clamp, as a complete product, ready to be installed on a tubular or octagonal pole (OD 76 of 90 mm diameter).
- ◆ The AIO solar light reaches up to 150 lm/w efficacy and is customizable as per customers' requirements.
- ◆ To know about PV panel, battery capacity, pole type, and other details please refer to specific product TDS.
- ◆ Bluetooth, remote monitoring, hybrid 230V AC operation, and other smart functionality are available if demanded, at extra cost.
- ◆ IP 65 in terms of individual component which makes entire product IP65.
- ◆ MPPT high-efficiency charge controller with smart battery health monitoring algorithm is available along with dusk-to-dawn auto ON/OFF facility.
- ◆ Inbuilt PIR motion sensor-based auto dim/brightness features have been provided to enhance autonomy.
- ◆ LIFEPO4 battery WRP pack, used with BMS, is inbuilt.
- ◆ The pole is not included in the price list; however, they can be provided at extra cost.
- ◆ Inbuilt automatic dimming has been provided in addition to the dusk-ON feature, based on PIR sensing or SOC bases.
- ◆ Our LED street lights have CCTs ranging from 5700K to 6500K; those who need different CCTs (3000K or 4000K) can order them and we will respond to the orders based on the demand.
- ◆ WP denoted as With Pole, WOP as Without Pole and OCT as Octagonal pole.
- ◆ All of our customized products will be available on demand, and the costs may vary accordingly.

INTEGRATED - PV ROTATION & SEMI INTEGRATED SOLAR LED STREET LIGHTING

- ◆ The Integrated Solar LED Street Light with the PV rotation system is similar to the all-in-one model, except that it is equipped with a PV panel rotation arrangement to install PV panels in the desired direction, irrespective of direction of the LED Luminaire and LiFePO4 battery placed in a flat box under the PV panel's battery, and the PV panel is connected with the plug-in/-out connector for easy connection and after sales service. This product comprises of the LED Luminaire with an in-built solar charge controller, a solar PV module, battery, and a mounting clamp that complete the product for it to be ready to install as an integrated all in one product.
- ◆ The semi-integrated solar LED street light is similar to the integrated-PV rotation light except that its battery is placed inside the LED Luminaire. The LED Luminaire with an in-built battery is connected with the PV panel, and as such, it is a complete, ready-to-install system that can be used directly without the need for any other accessories.
- ◆ To know about PV panel, battery capacity, pole type, and other details, please refer to the specific product TDS.
- ◆ Bluetooth, remote monitoring, hybrid 230V AC operation, and other smart functionalities are available as per requirement, at extra cost.
- ◆ IP65 in terms of individual component which makes entire product IP65.
- ◆ The MPPT high efficiency charge controller with smart battery health monitoring algorithm is available along with the dusk-to-dawn auto ON/OFF option.
- ◆ The inbuilt PIR motion sensor-based auto dim/brightness features help with enhancing autonomy.
- ◆ The LiFePO4 battery WRP pack used with BMS is inbuilt.
- ◆ Poles are not included in the price list; however, they can be provided at an extra cost.
- ◆ Inbuilt automatic dimming provided after dusk-ON, is based on PIR sensing or SOC bases.
- ◆ Our LED street lights have CCTs ranging from 5700K to 6500K, however can be available in different CCT like 3000K, 4000K on demand.
- ◆ WP denoted as With Pole, WOP as Without Pole and OCT as Octagonal pole.
- ◆ Any customization of our products is available on-demand, and the cost may vary accordingly.

SOLAR HOME LIGHTING SYSTEM

- ◆ The Solar Home System is stand-alone unit that comes in 3 variants, which include LED lamps in different combinations, a DC fan, a battery, a PV panel along with the required wires and other accessories as applicable.
- ◆ This is a ready-to-use product in both rural and urban areas. To know about the PV panel, battery capacity, led lamps and fans, quantity/wattage, and other details, please refer the specific product TDS.
- ◆ This system also has a USB port for charging mobile phones.
- ◆ The MPPT's high efficiency charge controller with a smart battery health monitoring algorithm has a switch to ON/OFF it on, manually.
- ◆ The LiFePO4 battery WRP pack used with a BMS that is inbuilt is meant to ensure the health of battery pack. The product, as such, is available in 5700K CCT, and if there's demand, the required CCT can be made available given the requirement communicated to us.
- ◆ Any customization of this product is also available on demand, and the cost may vary accordingly.

SOLAR TRAFFIC BLINKER

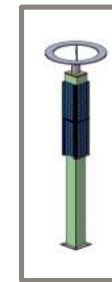

- ◆ The solar traffic blinker, widely used over highways, expressways, and other roads to control traffic movements.
- ◆ Its casing is made of polycarbonate, duly available in the 200mm and 300mm diameter options, in red, green, and amber-color LEDs.
- ◆ It comes with an inbuilt LIFEP04 battery pack and an external PV panel, ready to install over an existing pole.
- ◆ To know about the PV panel, battery capacity, pole type and other details, please refer to the specific product TDS.
- ◆ This product is duly IP65-protected.
- ◆ The MPPT high efficiency charge controller has a smart battery health monitoring algorithm.
- ◆ The inbuilt, pre-programmable LED flashing is as per stipulated standards or customizable, as required.
- ◆ The LIFEP04 battery WRP pack that is used with BMS is inbuilt to ensure the health of battery pack.
- ◆ WP denoted as With Pole, WOP as Without Pole and OCT as Octagonal pole.
- ◆ Any customization in product also available on demand and cost may vary accordingly.

INTEGRATED SOLAR POST-TOP POLE

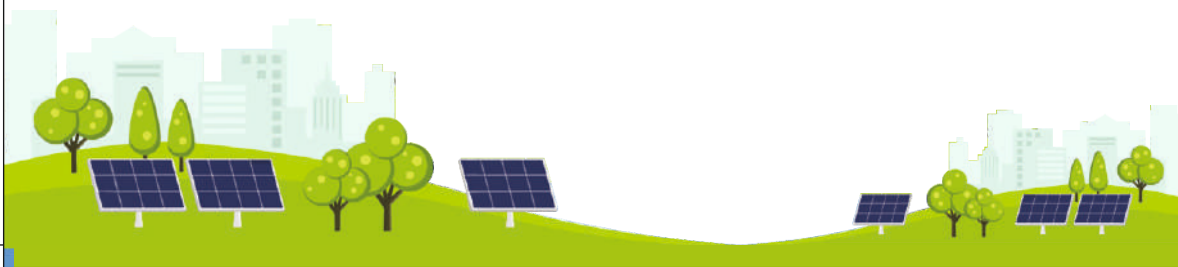

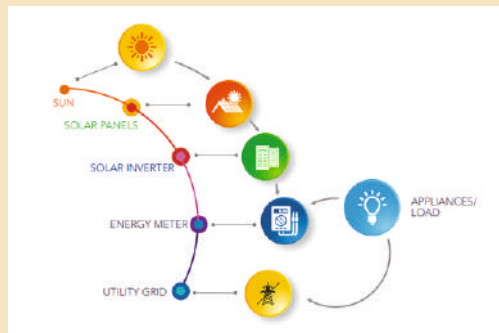

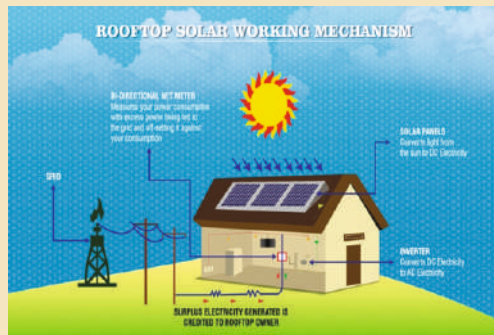

- ◆ The integrated solar post top pole is an innovative, urban spark product, which is made of a hot dip galvanized 3mm thick MS sheet duly given a poly paint finish; it comprises 4 direction PV panels on all 4 sides, and its integrated, inbuilt LIFEP04 battery has a highly efficient charge controller and post-top light. This product has been designed in such a manner that it can utilize solar radiation throughout the day by putting the PV panel across the pole's sides.
- ◆ This ready-to-install product comes with poles and all of the other accessories. It is available in 4-meter and 6-meter pole heights.
- ◆ To know about the PV panel, battery capacity, pole type, and other details, please refer to the specific product TDS.
- ◆ Bluetooth, remote monitoring, hybrid 230V AC operation and other smart functionalities are available on demand at an extra cost.
- ◆ IP65 in terms of individual component which makes entire product IP65.
- ◆ The MPPT high efficiency charge controller comes with smart battery health monitoring algorithm, along with dusk-to-dawn auto ON/OFF.
- ◆ The product also has an inbuilt, pre-programmable, auto dimming with the after-dusk-ON option.
- ◆ The LIFEP04 battery WRP pack used with BMS is inbuilt to ensure the health of the battery pack.
- ◆ This LED post top light is available only in 3000K–6500K CCT options.
- ◆ WP denoted as with pole WOP as without pole and OCT as octagonal pole.
- ◆ Any customization in product also available on demand and cost may vary accordingly.

Solar Power Plant

Halonix offers rooftop, ground mounted power plant and solar water pump system for industrial, residential and government sectors. As an approved MNRE channel partner, we provide end-to-end power plant solutions with remote monitoring and controlling systems along with DG synchronisation and it can be customised as per project or demand. We use high efficient multi crystalline PV panel which is in compliance with industry standard such as IEC 61215, IEC 61730 and others as per MNRE standard and robust solar inverters along with all other sub-components as per standards. The PV module and its structure are designed to withstand highly corrosive atmosphere and heavy wind load.

Types of Solar Power Plant

Process flow- Power plant project

We have a dedicated team who interact with the customer and based on their requirements, site survey takes place and accordingly techno-commercial offer is submitted. We do provide warranty over complete system as per industry standards and our all India service team looks after the on-site service / AMC support whenever needed.

Note: Price will be given as per project and site requirements.

SMART STREET LIGHT WITH REMOTE CONTROL & MONITORING SYSTEM

This individual control and monitoring of street light works in a similar manner as explained in CCMS system, however the only difference here is that each street light having inbuilt or external RF controller which communicates to each street light form the MESH network. By adopting multiple hopping, it covers long distance and multiple data can be transferred. Users can control and monitor a group of lights or individual light remotely using an android app-based software and complete data storage over the cloud. This communication is dual way communication and will enable users to know whether given any command accepted or executed by a group of lights or any specific light pole.

HOW IT WORKS

TERMS & CONDITIONS

- ◆ All prices are subject to our general terms and conditions of business
- ◆ Prices are exclusive of GST as per prevailing rates, octroi and other local levies, if any which shall be charged extra as applicable at the time of dispatch
- ◆ Any statutory variation will be customer's account
- ◆ Maximum Retail Price (MRP) wherever mentioned are inclusive of GST as per the prevailing rates
- ◆ All prices of luminaires are per unit basis and without lamps
- ◆ Please contact authorize Halonix representative for prices marked as "POR"
- ◆ The image depicted in the price reckoner may vary from the actual product
- ◆ Warranty voids for LED fixtures including drivers, if individual points of installations are not provided with proper earthing
- ◆ Dealers may sell at prices lower than the LIST PRICE and M.R.P.
- ◆ Prices are subject to change without any prior notice as per company discretion
- ◆ This price reckoner supersedes all earlier price reckoners
- ◆ Disputes if any will be subject to NOIDA jurisdiction only
- ◆ The goods remain the property of HALONIX TECHNOLOGIES PVT. LTD. till receipt of the invoice value
- ◆ HALONIX TECHNOLOGIES PVT. LTD. reserves the right of continues improvement in product to modify technical specification or dimensions in order to archive product enhancement without prior notice

Notes:

The suffix CW/NW/WW in the Cat. Ref. Nos. stands for Cool White/ Neutral White/Warm White respectively
Some abbreviations used: CRCA-Cold rolled cold annealed; AL-Aluminium; IP-Ingress protection

NOTES
